NIXQUIT! SAYSHE!

NOT ELECTED YET!

The Obstructionists Succeed in
Breaking a Quorum.

NICE GANG OF LANE GARDENERS!

DR. W. G. HUNTER.

Special to The Public Ledger.

FRANKFORT, April 2d.

The Free-soil Democrats and 6 of the Republican patriots who are opposing the Republican caucus nominee refused today to answer to their names, thus breaking a quorum.

There was one ballot only—

Hunter.....55

David.....7

Bayle.....1

When the Joint Assembly adjourned.

GOOD IF TRUE.

The report comes pretty straight this afternoon that Hunter will be voted for till next Wednesday, when Judge Holt will be entered, and is almost certain to be elected if an election has not resulted before that time.

The steering committees have agreed that only one vote shall be cast for each candidate tomorrow, as there is no possibility of an election.

If you have friends visiting you, or if you are going away on a visit, please drop in a note to that effect.

GET the BEST!

THE LEADER'S SPECIAL LETTER FROM THE CAPITAL.

Special Correspondence Public Ledger.

WASHINGTON, April 2d, 1897.

The Republican party has again shown its business-like qualities. In less than two weeks from the time of its meeting, the House, controlled by this party, has considered and passed the Tariff bill and has done so despite the opposition and delay and a fault-finding system of the Democrats. The bill now goes to the Senate, where the Republicans have already shown their business-like methods by taking it up in committee and putting more than a week's labor upon it prior to its passage by the House. It is expected that the bill will be completed by the committee during the present month and be taken up by the Senate early in May, passed by that body in June, and go into effect July 1st. President Cleveland and the Free trade Congress, elected in November, 1892, did not get their Tariff bill upon the statute books until August 25th, 1894, one year and ten months from the date of the election. It looks now as though the Republicans would get their Tariff measure on the statute books within seven months of the date of election, possibly even sooner than that.

THE CUBAN SITUATION.

The State Department continues to receive encouraging reports from Cuba. The attitude of the authorities there has undergone a remarkable change since this Administration came into operation. Every few days brings reports of additional releases, and only three citizens of the United States now remain in Cuban prisons, asking intervention by this Government in their behalf. Several others are still imprisoned, but they have either been given the fullest rights of trial under our treaties with Spain, or have, for reasons of their own, omitted to ask intervention in their behalf by this Government. No feature of the present Administration has been received with such marked satisfaction and commendation as that relating to the rights of American citizens abroad.

ENCOURAGING TO THE FARMERS.

Wool, wheat and corn, those three staple agricultural products, are feeling the effect of renewed confidence and renewed prosperity which have followed the inauguration of McKinley. The standard commercial authorities report higher prices for wool, wheat, flour, and other articles of agricultural production, and show that the wheat and flour exportations of the week just ended are greater than those of the corresponding week last year, and those of the corresponding three years as great as those of the corresponding week of last year. The farmers of the country are finding no occasion for regret that they voted for McKinley and Prosperity.

THE SUGAR SCHEDULE DISAPPOINTS THE DEMOCRATS.

Democrats in Congress and elsewhere are greatly disappointed with the sugar schedule of the Dingley Tariff Bill as well as other features. They are especially disappointed regarding the sugar schedule as they are unable to find in it any opportunity to charge that the bill is advantageous to or in the interest of trusts. They remember with great bitterness the fact that their own law which now stands upon the statute books was condemned by the public generally as framed in the interests of the sugar trust, and they had hoped to find some opportunity to make a similar charge against the Dingley Bill, but in this they have absolutely failed, and those of them who are frank enough to confess the truth admit that it wipes out the advantages which the sugar trust has enjoyed under the present Democratic law.

PROTECTION GAINING GROUND.

The divisions in the Democratic ranks are as strongly marked on the Tariff question as they were in the currency discussions of last fall. The recent debates in Congress have shown a very rapid growth of Protection sentiment among the Democrats, and a growing hostility to the extreme Free-trade and free raw-material views of the Cleveland wing of the party. Numbers of Democrats declare their hostility to the Free-trade theories of Cleveland, Wilson, et al., while others denounce in their

More Talk

About Time.

Some people are peculiar in the matter of buying a Watch. A silver Watch is good enough for one man so long as it keeps good time. Another one wants something a little more showy—a gold one,—but it, too, must keep good time. Some want a high-priced Watch, others a cheaper one, but after all everybody wants a correct timepiece. We selected our stock with time in view, and can sell you a high, low or medium-priced Watch—and any of them will keep time—the essential point.

We repair Watches so that we can guarantee them to keep time. Charges low.

speeches the free raw-material proposition, a few of the most independent thinkers going so far as to vote for the Dingley Bill, although their party associates had denounced it as the most radical Tariff measure ever offered in Congress, not excepting the McKinley Law.

THE REMARKABLE WILSON LAW.

The Wilson Law has made a remarkable record in the month just ended. It has actually created a surplus for the month. The receipts for the month have far a wonder been greater than the expenditures, and that, too, without holding back any great quantity of the current bills, as has been the case when it was found desirable to make an apparent surplus under the Carlisle Administration of the Treasury Department. The Wilson Law has been in operation thirty-one months, and in that time there have been five months when it has made an apparent surplus. In every case, except the present month, however, the apparent surplus was created by holding down the expenditures far below the demands upon the Treasury for that particular month.

In September, 1895, when it was found desirable to give the Democratic orator something favorable to say about the law, just before the election of that fall, a small surplus was created by holding down the expenditures, but in the very next month the deficit was something enormous, reaching nearly \$100,000 for the month. In the closing months of the fiscal and calendar years under the Carlisle Administration it was found possible to make a favorable showing for those single months so as to make the deficit of the year as small as possible, but this was always compensated for by an enormous deficit in the months which immediately followed, so that the month of March, 1897, is the only one in the history of the law in which it has really made a surplus without holding back the expenditures. This is not, however, due to any improvement in the workings of the law or anything of the kind. It is simply the result of the fact that the importations at New York took alarm lest the Dingley Bill should cut off their privileges of importation at the low rates of the Wilson Law and so rushed in many millions of dollars worth of goods during this month, thus swelling the receipts to an abnormal sum. It is because of this fact, and this alone, that the Wilson Law has made a record of meeting the requirements of the Treasury for a single month.

DAMAGE SUITS.

Seventeen of Them Filed Against the C. and O. Railway at Louisa.

Many of our citizens will remember the day last fall that when William Jennings Bryan spoke in this city and how the people stood around in the town to hear the Boy Orator sing his little song of 16 to 1. Several excursion trains were run to accommodate the expected throng, among them one from Ashland, and attached to this train was a coach from Louisa, filled with a crowd of citizens of that town.

On the return to Ashland the Louisa coach was side-tracked, and the passengers had to spend the night in it and were sent home on the morning train.

The Louisa people have now brought damage suits against the C. and O. Railroad in the Lawrence County Court, and the cases will come to trial next month. There have been seventeen of these suits filed and they are for \$1,000 each.

The reader of this paper will be pleased to learn that there is at least one devoted disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer \$100 Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. WE'RE FOR AMERICA! AMERICANS!

The House Committee on Revenue and Taxation is trying to make a beginning on the needed revenue legislation. It reported bills, originating in the Committee, to fund \$500,000 of floating indebtedness of the state, to issue interest-bearing warrants after July 1st, and to increase the state tax from 42 1/2 to 52 cents. Now, if the 48 bullheaded Republicans who are voting for the regular Republican nominee for United States Senator could only be overcome by the self-sacrificing patriots who are obstructing all business, some consideration might be given to public demands.

The announcement from Japan that that country, although going to a gold standard, will not sell any of its silver creates no surprise among those who have watched the progress of events with reference to the use of silver throughout the world. The United States, for instance, has many times the quantity of silver currency as when she adopted the gold standard, and gold standard Nations are increasing the quantity of their silver constantly and with rapidity. The coinage of silver runs from 110 to 150 million dollars per annum steadily, and a large share of it by the gold standard Nations of the world. The silver currency of the world is today vastly greater than it was 25 years ago and the leading Nations of the world who have adopted the gold standard are the ones who have increased the silver currency.

"PROFESSOR" WILSON, the author of the present Tariff failure known as the "Wilson Law," has issued an elaborate edition of the Dingley Bill intended to direct attention away from the failure of his own law, which President Cleveland denominated as one of "perjury and dishonor." The absolute unfairness and unreliability of his criticisms of the Dingley Bill are shown by his attempting to prove that his own law is a success in the face of the fact that it has produced a deficit in the two and a half years of more than \$130,000,000, and that during the Administration under which it was enacted the public debt was increased \$296,000,000 and the interest charge nearly a million dollars a month. This alone shows the absolute worthlessness and unreliability of his attacks upon the Dingley Bill.

PRESIDENT MCKINLEY and his official family are evidently less distressed about the condition of the Civil Service under the new rules than are many of the politicians. This is evidenced by the fact that his Postmaster General has announced that the policy of the Administration will be to permit all Postmasters to serve out their full four years, and that the custom of setting an official headman at work decapitating Postmasters by the wholesale in the opening months of the Administration will be abandoned. While the Civil Service has undoubtedly been abused by the recent Administration, which filled every possible niche and then sealed the doors with the new order, it does not seem probable that there will be any similar abuse by excessive zeal in violating the principles of the Civil Service system devised and put into effect by the Republican party.

OLD HANDS

Take Charge of the Government Printing Office.

Secretary Gage Strikes Against the Importunities of Office Seekers.

A Discharged Employee of the Treasury Department Retained—Senator Gage's Brother-in-Law Retained to a Small Clerkship.

WASHINGTON, April 3.—Public Printer Palmer Friday resumed charge of the government printing office after an absence of three years. He found a handsome bouquet of roses on his desk from the employees, of whom he was glad to see him back. He appointed W. H. Collins to his old place of chief clerk, vice W. A. Waterbury, who served with Mr. Benedict.

Mr. Waterbury, as are all the employees of the department, was under the protection of the civil service law, but his appointment having been a personal one with the retiring public printer, he had made arrangements to go into business elsewhere. Mr. Collins went into the government printing office as an apprentice, and in a few years ago worked himself up through various grades of service. Mr. Palmer also reappointed Capt. T. Brian, foreman of the office, which he has filled for many years.

WASHINGTON, April 3.—Secretary Gage has struck against the importunities of office-seekers. For the short period he has been in office little opportunity has been given him to attend to office business. His room has been crowded early and late with people who want positions and those who had friends who are candidates. Friday morning the secretary had no opportunity to look into the affairs of the department before going to the cabinet meeting. Friday afternoon he took the bit in his teeth and issued this order:

"Hereafter the secretary will receive visitors only between the hours of ten and one on days other than cabinet days. On cabinet days visitors will be received from 9 until 10:30. No visitors will be received at other hours except on urgent official business."

WASHINGTON, April 3.—Another employee of the treasury department, discharged under the last administration, was reinstated by Secretary Gage Friday. He is D. W. Harrington, of New York, who was dismissed from the service after serving 25 years. Mr. Harrington gets his old position of chief of the accounts division, and the incumbent, J. B. Lowell, who succeeded him, is transferred to the auditor's office as an assistant chief of division.

Mr. Harrington is in conformity with the policy of Secretary Gage, with reference to veterans of the late war who were dropped from the rolls of the treasury department. WASHINGTON, April 3.—Stephen Gambill, brother-in-law of Benjamin Harrison, and chief of the division of requisition and accounts of the war department, was Friday reduced to a clerkship in that division and Charles B. Tanner, an old worker, who formerly held the position but had been removed several years ago, was reappointed.

N. J. Whitton, formerly Assistant Secretary of the private secretary and recently chief of the war department supply division, was removed Friday and Martin H. Thompson, who formerly held the position, but had been reduced to a clerkship, was promoted to the vacancy.

WASHINGTON, April 3.—The monthly statement showing the amount of gold and silver coins and certificates, United States notes and national bank notes in circulation on April 1, issued by the treasury department Friday, gives the circulation per capita as \$24.91, based on an estimated population of 75,000,000.

The gold coin in circulation on the date named was \$27,125,000, an increase for the month of \$800,000; standard silver dollars, \$34,507,216, a decrease of \$871,425; gold and silver certificates, \$37,409,329, a decrease of \$58,400; treasury notes, \$39,244,910, an increase of \$1,009,182; United States notes, \$21,610,000, a decrease of \$12,200,000; national bank notes, \$22,400,183, an increase of \$2,109,840. The total circulation on April 1 was \$1,969,000,000, a net decrease of \$6,004,250.

The net increase in the money and bullion in the treasury during March was \$7,898,482.

WASHINGTON, April 3.—T. A. Rhodes, an old soldier formerly employed as a compositor in the government printing office, has entered suit against T. T. Benedict, ex-public printer, claiming \$300 damages for violation of the civil service rules. It is understood that a number of similar claims will be entered.

Mr. Robert L. Baines, chief of the returning division, dead letter office, was Friday afternoon thrown from his bicycle and his throat struck by a sharp picket of the post office department fence, making a terrible gash and knocking out a number of teeth. He was taken to the Emergency hospital. The accident may result fatally.

WASHINGTON, April 3.—Bear Adm. John H. Russell, retired, died at his residence here Friday after an illness of about a month. He was born in Frederick, Md., in 1827, and entered the navy as a midshipman when only 14 years old. He was many years active naval service during the Mexican war. He was commissioned by the navy department for services in capturing the privateer Judah at Pensacola in September 1861; participated in all the engagements of Farragut in the Mississippi up to Vicksburg.

Johnnes Brahms Dyck, the famous composer, who has been seriously ill for some time, is now in an extremely critical condition, and only slight hopes are entertained of his recovery.
